DELEGATE INFORMATION PACK

AIE401 · WORKSHOP 1

Artificial Intelligence for Educators

Foundations and applied practice: what AI is, how to use it well, and how to judge what it gives you

WORKSHOP DETAILS

Wednesday 18 November 2026

Online, via Microsoft Teams

Joining from 13:15 | Workshop 13:30 to 17:00 | Community of Practice from 17:00

Organised by Blackpool School of Computing, Blackpool and The Fylde College, part of the B&FC Group

01 / WELCOME AND OVERVIEW

Welcome to the workshop

The first of four workshops, leading to the AI for Educators Summit.

Welcome

Welcome to AIE401 Artificial Intelligence for Educators. This workshop is the entry point to the module and the only one that assumes no prior learning, so whether you use AI every day or have barely tried it, you are in the right place. Thank you for joining us.

AI is already part of teaching and learning, yet educators and institutions are at very different stages. Learners are using it, staff are experimenting, often on their own, and institutions need practice they can trust. This module builds the professional judgement to evaluate, adopt and lead the responsible use of AI in your own setting.

The afternoon is practical. A short keynote and a foundations input are followed by three breakout workshops in which you use AI tools on real teaching material, test what comes back, and compare your judgement with colleagues from other subjects and settings. You leave with the foundations of the action research project you will present at the Summit.

Workshop objectives

01 **AI foundations**
Understand what AI is, distinguish machine learning, generative AI, adaptive systems and automation, and set your own starting point.

02 **Applied practice**
Use AI to plan, create, assess and adapt teaching resources through iterative prompting, and test the results against your professional judgement.

03 **AI literacy and your project**
Explore what AI literacy means for staff and learners, and draft the practice problem that will become your action research.

02 / WORKSHOP PROGRAMME

Artificial Intelligence for Educators

Wednesday 18 November 2026 | Online, Microsoft Teams | 13:15 to 17:00

TIME	SESSION	FOCUS / FORMAT
13:15 to 13:30	**Joining and tech check**	Join the Teams meeting, test your camera and microphone, and open the resources site.
13:30 to 14:00	**Opening keynote**	The module, your assessment and the AI for Educators Summit, with an icebreaker poll and AI Bingo.
14:00 to 14:25	**What AI actually is**	Four families of AI, how generative AI writes, what it does well and poorly, and the AI or Not? quiz.
14:25 to 14:40	**Your starting point**	The AI Digital Skills Check, the Starting Point diagnostic, and setting up your reflective journal.
14:40 to 15:15	**Breakout one, Prompt Relay**	Planning and content creation. Turn a weak prompt into a resource you would actually use.
15:15 to 15:25	**Break**	Ten minutes. Stay signed in.
15:25 to 16:00	**Breakout two, Mark the Machine**	Assessment and feedback. Mark a fictional answer yourself, then compare your judgement with the AI.
16:00 to 16:30	**Breakout three, One Resource, Five Learners**	Inclusion and personalisation. Adapt a text for different learners and check the meaning survives.
16:30 to 16:45	**AI literacy**	What staff and learners need to know, and integrity by design, with a chat waterfall.
16:45 to 17:00	**Close and next steps**	Draft your practice problem, plan your directed study before Workshop 2, and complete the exit ticket.
From 17:00	**Community of Practice**	Introduce yourself in the AIE401 Teams Community of Practice and join the first discussion.

03 / KEYNOTE AND WORKSHOP TEAM

Keynote

OPENING KEYNOTE

Keynote speaker to be confirmed

Opens the workshop, then returns to lead AI literacy and the close.

Workshop team

Breakout one, Prompt Relay
Foundations input and planning and content creation

Breakout two, Mark the Machine
Assessment and feedback

Breakout three, One Resource, Five Learners
Inclusion and personalisation

Organiser
Runs the Teams meeting, breakout rooms, polls and timers, and is your first contact for technical help on the day

Tutors visit every breakout room during the afternoon, so you will meet the whole team.

Discussion questions

1. What changes in the output when you tell an AI tool about your learners, and what would you never use without checking?

2. Where does AI belong in marking and feedback, and where must the judgement stay with the teacher?

3. When AI adapts a resource for a learner, is that genuine personalisation or just a different reading level?

4. What does every learner need to understand about AI before they use it on your course?

04 / PLAN YOUR AFTERNOON

Joining online

Microsoft Teams

Your Teams meeting link is in your joining instructions email. The meeting opens at 13:15. Please join from the Teams desktop app if you can, because breakout rooms work best there.

Getting ready

BEFORE THE DAY

- Check you can sign in to the **college approved AI tool** with your institutional account
- Test your camera and microphone in Teams
- Have a topic in mind that you are teaching in the next few weeks

YOUR RESOURCES SITE

tinyurl.com/AIE401workshop1
Breakout task cards, your Skills Check and Starting Point, games, the Prompt Lab and the recap. Keep it open all afternoon.

BREAKOUT ROOMS

Rooms of four or five, mixed by subject and setting, open automatically. Roles rotate so everyone drives the AI tool: **Prompter**, **Critic**, **Subject expert** and **Reporter**.

Two screens, or two windows, make it much easier: one for Teams, one for the AI tool and the resources site.

COMMUNITY OF PRACTICE

The AIE401 Teams Community of Practice carries the learning between workshops.

- **Introductions**, your first post, today
- **Breakout outputs**, prompts and resources
- **Where AI adds value**, the first discussion

Online etiquette

Cameras on when you can, questions in the chat at any time, and raise your hand to speak. If you lose connection, rejoin with the same link and the organiser will return you to your breakout room.

05 / ON THE DAY

Data, accessibility and contact

IMPORTANT | LEARNER DATA AND AI TOOLS

No real learner work, learner names or personal data go into any AI tool during the workshop. Everything you need is either fictional or your own teaching material.

Use only the AI tool your institution has approved, signed in with your institutional account. Free public chatbots may store or reuse what you type.

Everything AI produces is a draft until someone with subject knowledge has checked it. That includes the resources you build today.

Accessibility and adjustments

Live captions can be switched on from the More menu in your Teams meeting controls. All workshop resources are designed to work with screen readers and are available in Word and online versions, and the resources site has a dark mode.

If you need an adjustment, or would like to discuss access arrangements before the workshop, please email the module team using the contact details below.

Your progress and privacy

Progress on the resources site, such as quiz scores and your Skills Check, is saved only in your own browser and is never sent anywhere. Your Starting Point diagnostic and Skills Check are shared with your tutors only when you upload them to Canvas, so they can tailor support.

Recording and images

Workshop outputs posted in Teams, such as the chat and breakout outputs, are kept to support your learning. If any part of the session is to be recorded, the organiser will tell you before recording starts, and you can keep your camera off.

Questions and contact

Module team: Lee.holroyd@blackpool.ac.uk
