DELEGATE INFORMATION PACK

AIE401 · SESSION 1

Artificial Intelligence for Educators

Foundations and applied practice: what AI is, how to use it well, and how to judge what it gives you

WORKSHOP DETAILS

Wednesday 18 November 2026

Online, via Microsoft Teams

Joining from 13:15 | Session 13:30 to 17:00 | Community of Practice from 17:00

Organised by Blackpool and The Fylde College, part of the B&FC Group, in conjunction with the Lancashire & Cumbria Institute of Technology

01 / WELCOME AND OVERVIEW

Welcome to the first session

The first of four sessions, leading to the AI for Educators Summit.

Welcome

Welcome to AIE401 Artificial Intelligence for Educators. This first session is the entry point to the module and the only one that assumes no prior learning, so whether you use AI every day or have barely tried it, you are in the right place. Thank you for joining us.

AI is already part of teaching and learning, yet educators and institutions are at very different stages. Learners are using it, staff are experimenting, often on their own, and institutions need practice they can trust. This module builds the professional judgement to evaluate, adopt and lead the responsible use of AI in your own setting.

The afternoon is practical and collaborative. After an opening keynote and an introduction to the assessment, the Summit, mentoring and how the programme runs, you will work with colleagues from other subjects and settings to explore how AI can support planning, assessment and inclusion, and you will leave with the foundations of the action research project you present at the Summit.

Workshop objectives

01 **AI foundations**
Understand what AI is, how it works and where it is useful in education.

02 **Applied practice**
Explore how AI can support teaching, assessment and inclusion, guided by professional judgement.

03 **AI literacy and your project**
Consider what AI literacy means for staff and learners, and begin shaping your action research.

Inside this pack

Page 3 Workshop programme

Details are correct at the time of preparing this pack and may change. Any updates will be sent to you by email before the workshop.

02 / WORKSHOP PROGRAMME

Artificial Intelligence for Educators

Wednesday 18 November 2026 | Online, Microsoft Teams | 13:15 to 17:00

TIME	SESSION	FOCUS / FORMAT
13:15 to 13:30	**Joining and welcome** **Lee Holroyd and Marc Potter**	Join the Teams meeting, check your audio and video, and a welcome to the programme.
13:30 to 14:00	**Opening keynote** **Professor Marcello Trovati**	AI in education today, its opportunities and its challenges.
14:00 to 14:15	**The assessment and the AI for Educators Summit** **Lee Holroyd**	An introduction to the assessment and the Summit, with a short discussion of mentors and the logistics of the programme.
14:15 to 14:30	**AI foundations and initial AI skills assessment** **Marc Potter**	What AI is and how it works, and an initial assessment of your own AI skills to set your starting point.
14:30 to 15:15	**Planning and content creation** **Christopher Green**	**Workshop 1** Using AI to plan and create teaching resources, and refining what it produces.
15:15 to 15:30	**Break**	
15:30 to 16:15	**Assessment and feedback** **Kyle Cameron**	**Workshop 2** Where AI can support assessment and feedback, and why professional integrity is key.
16:15 to 16:45	**Inclusion and personalisation** **Michael Thornhill**	**Workshop 3** Using AI to make learning more accessible and inclusive for different learners.
16:45 to 16:55	**AI literacy** **Marc Potter**	Key takeaways from the session, through a discussion of what AI literacy means for staff and learners.
16:55 to 17:00	**Close, next steps and Community of Practice** **Lee Holroyd and Marc Potter**	Preparing for the next session, and joining the AIE401 Community of Practice.

03 / KEYNOTE AND SESSION TEAM

Keynote

OPENING KEYNOTE

Professor Marcello Trovati

Professor of Digital Transformation, School of Business, University of Lancashire

Professor Trovati leads the Centre for Business Futures and is editor in chief of the journal *Applied Artificial Intelligence*. His work centres on AI, including machine learning, natural language processing and automated decision making, alongside mathematical modelling and data science. He has published more than 150 articles, books and conference papers, and has led AI and data science projects with industry and academic partners.

Session team

Lee Holroyd
Curriculum Leader in Digital Computing, Blackpool School of Computing
Welcome, the assessment and the Summit, mentors and programme logistics, and the close

Marc Potter
Welcome, AI foundations and the initial AI skills assessment, AI literacy, and the close and Community of Practice

Christopher Green
Planning and content creation

Kyle Cameron
Assessment and feedback

Michael Thornhill
Inclusion and personalisation

Organiser
Runs the online session and is your first contact for technical help on the day

Most themes are run in small groups, so you will work closely with the team throughout the afternoon.

Discussion questions

1. Where is AI already adding value in your own teaching, and where is it not?

2. How do we keep professional integrity at the heart of assessment and feedback when AI is involved?

3. How can AI help make learning more inclusive, and what are its limits?

4. What do staff and learners need to understand to use AI well and responsibly?

04 / PLAN YOUR AFTERNOON

Joining online

Microsoft Teams

Your Teams meeting link is in your joining instructions email. The meeting opens at 13:15, and the Teams desktop app works best.

Getting ready

BEFORE THE DAY

- Check you can sign in to your **institution's approved AI tool**
- Test your camera and microphone in Teams
- Have a topic you teach in mind to work on

HELP ON THE DAY

If you have a technical problem during the workshop, message the organiser in the Teams chat and they will help you get back on track.

SMALL GROUP WORK

Much of the afternoon is spent in small online groups with colleagues from different subjects and settings. Two screens, or two windows, will make this easier.

COMMUNITY OF PRACTICE

An AIE401 Community of Practice in Teams continues the conversation between workshops, so you can share ideas and practice with the cohort.

Online etiquette

Cameras on when you can, questions in the chat at any time, and raise your hand to speak. If you lose connection, simply rejoin with the same link.

05 / ON THE DAY

Data, accessibility and contact

IMPORTANT | LEARNER DATA AND AI TOOLS

No real learner work, learner names or personal data go into any AI tool during the workshop. Everything you need is either fictional or your own teaching material.

Use only the AI tool your institution has approved, signed in with your institutional account. Free public chatbots may store or reuse what you type.

Everything AI produces is a draft until someone with subject knowledge has checked it.

Accessibility and adjustments

Live captions can be switched on from the More menu in your Teams meeting controls. Workshop resources are designed to work with screen readers and are available in Word and online formats.

If you need an adjustment, or would like to discuss access arrangements before the workshop, please email the module team using the contact details below.

Privacy

Your self assessments are shared with your tutors only when you choose to upload them, so they can tailor support to you.

Recording and images

If any part of the session is to be recorded, you will be told before recording starts, and you can keep your camera off.

Questions and contact

Module team: Lee.holroyd@blackpool.ac.uk
Blackpool School of Computing, Blackpool and The Fylde College

Thank you for joining us.
